

MISSION CRITICAL HYBRID POWER SYSTEMS THAT TRANSFORM COMMUNITIES

Delivered Ready to Deploy - ANYWHERE

HCI Energy provides **reliable, turnkey, eco-friendly power** for critical missions **anywhere in the world**. We combine the latest in power technology and renewable sources to ensure round-the-clock, **uninterrupted power** that **lowers operational cost** while facilitating crucial business and connecting remote communities.

HCI Products At-a-Glance

HYBRID POWER SHELTER

More than just power. More than just a shelter. HCI's hybrid power shelters are a mission control platform with integrated, customizable renewable resources (solar and wind).

ZERO GLITCH POWER MODULE (ZPM)

The heart of every HCI system. HCI's proprietary ZPM technology ensures uninterrupted, optimized power with remote monitoring. Also available as stand-alone back-up power.

INDUSTRY

- ✓ Tribal Communities
- ✓ Wireless Carriers
- ✓ WISPs
- ✓ Regional Telecom
- ✓ Governments
- ✓ Emergency Response

Uninterrupted Power — Never Lose a Second

Never lose a second of critical connectivity between switchovers with HCI’s battery-first architecture. Power is held stable while the ZPM accommodates input from multiple sources. A variety of outputs (AC, DC, multiple voltages) provides power to all types of equipment.

HCI Advantages

- ✓ **Ready.** Self-contained and pre-configured. Delivered ready to deploy.
- ✓ **Reliable.** Uninterrupted power – the latest power technology, real-time power management, remote monitoring.
- ✓ **Renewable.** Supports ESG mandates. Reduced CO2 and GHG emissions.
- ✓ **Efficient.** Accelerated deployment time. Lowered cost.
- ✓ **Proven.** Tested and debugged before delivery. No surprise outages.
- ✓ **Rugged.** Engineered for harsh climates.
- ✓ **Flexible.** Multiple outputs. Room for customer equipment.

**FROM THE ARCTIC TO REMOTE ISLANDS,
HCI PROVIDES CONTINUOUS, RENEWABLE
POWER ANYWHERE.**

Success Story

**Keeping vital systems live
— even during a typhoon!**

ALASKA TRIBAL BROADBAND
 Unalakleet, AK

The rural village of Unalakleet, located 147 miles from Nome, did not have reliable power for their vital broadband and land mobile radio services. HCI’s Hybrid Power Shelter was delivered pre-configured and ready to deploy just 2 weeks before Typhoon Merbok with these results:

- Continuous connectivity even in the worst conditions.
- Reliable emergency back-up.
- Lowered maintenance costs.

“During the storm, power was down, but thankfully HCI’s integrated Hybrid Power Shelter was able to power the communications equipment for four days and could have kept running for several weeks!”

HAROLD JOHNSTON
 Founder and president, Alaska Tribal Broadband
